3.5.1 Road Network

The total aggregate of roads in the municipality is about 102 kilometers. Of this total, about 12.159 kilometers or 11.96% are classified as national roads. These roads form part of main trunk line system which generally cater to inter and intra municipal mobility and demand higher intensity and structural strength for long distance trips and heavy vehicles. These include the old Junction – Layac - Mariveles Road and the Roman Superhighway, a road parallel to the old road from Hermosa to Mariveles, which was constructed in support to the industrial areas and has an alternative route to the old road. On the other hand, provincial roads total to 18.91-kilometer or 18.52%, municipal road totals 11.191 or 10.96% and barangay roads comprise 59.77 kilometers or 58.55% of the total road network.

3.5.2 Power Supply and Electrification

The Municipality of Hermosa is served by the Peninsula Electric Cooperative (PENELCO) for its power needs on the 24-hour basis. All of the 23 barangays of Hermosa are energized, giving a rate of 100% barangay with electricity. PENELCO has a total of 14,530 household consumers representing 98% of households, 64 commercial consumers and 11 institutional consumers. The whole of the Poblacion is well electrified.

3.5.3 Water Supply

There is sufficient water for Domestic consumption in Hermosa. Main sources of potable water are underground water sources. Shallow wells are popularly used in upland area, while deep-well and free-flowing wells are popularly used in low land areas. Few others depend on rivers, creeks or stream for their water domestic need.

The existing Hermosa Water Districts has a total of 5085 concessionaires serving 13 barangays or 38 % of the total Household Population.
